Viktigaste egenskaperna

The Chainexpert line features stainless steel metal mesh gloves with patented stainless steel spring strap.

COMFORT

Due to their natural elasticity, the spring-type steel straps is self-adjustable.

SAFETY

The traditional plastic or textile straps with press stud fastening is replaced by "spring" straps with no risk for these straps to be unbuckled. The gloves have been made without any opening ensuring therefore complete protection for the hand and the forearm against the sharpest knife. Version in Titanium and detectable stainless steel.

HYGIENE

The 100% stainless steel guarantees a totally hypoallergenic glove, with no contamination risk from the fastening strap. It is bacteria-proof and easy to clean. Stainless steel can be used when in contact with food.
