1000107

Bilsom 304 - small - corded
SLC80 24dB Class 4. Approved to AS/NZS 1270:2002.

Overview

Key Features

- New yellow and white Leight Stripe delivers high degree of comfort and visibility when worn
- Patented polyurethane foam expands gently in the ear canal, reduces tendency to back out of the ear canal
- Less expansion pressure creates a more comfortable seal, wears more comfortably than other foam earplugs over long periods of time
- Smooth, soil-resistant skin prevents dirt build-up, promote proper hygiene
- Tapered bullet-shape design easier to roll-down and insert, adapts more evenly to shape of the ear canal
- Ideal for medium/high noise environments
- Available in two sizes [regular, small] for optimal fit and protection, ensuring proper fit for a wide variety of employees

Training & Proper Use

1. With clean hands, roll the entire earplug into narrowest possible crease-free cylinder.
2. Reach over your head with a free hand, pull your ear up and back, and insert the earplug well inside your ear canal.
3. Hold for 30 – 40 seconds, until the earplug fully expands in your ear canal. If properly fitted, the end of the earplugs should not be visible to someone looking at you from the front.
4. Proper Fit – If either or both earplugs do not seem to be fitted properly, remove the earplug and reinsert.
5. Removal – Gently twist earplug while slowly pulling in an outward motion for removal.
6. Acoustical Check – In a noisy environment, with earplugs inserted, cup your hands over your ears and release. Earplugs should block enough noise so that covering your ears with your hands should not result in a significant noise difference.

Additional Information

CARE + MAINTENANCE

- INSPECT – Inspect prior to fitting, examine your earplugs for dirt, damage or extreme hardness—discard immediately if compromised.
- DISCARD – For proper hygiene, discard Single-Use earplugs after use.
- HYGIENE – To maintain hygiene standards, Single-Use earplugs should be discarded at the end of every shift.
