	1031344	<b>Motorola ATEX Adapter PMLN5679</b>

**Overview**

**Key Features**

Radio Interface Cables provide connection from the QUIETPRO QP100Ex Control Units to your radio and communication systems. Provides one connector to attach the interface cable for a single channel, two-way communication radio via PORT 1.

Automatic Radio Configuration:

- Each cable contains a data memory device that is used by the Control Unit to determine the
- settings required to interface the radio / device to the Control Unit.
- Multi-function interface cables permit the connection of several different radio types to the Control Unit. The connector and electrical wiring of the cable are the same for a variety of radios. However, they require different Control Unit settings in order to provide high quality, clear audio. The user is presented a list of radio options through the headset (voice feedback). The user should select the correct radio model.

**Recommended Industries/Use**

**Hazards** • Fire Protection • Government • Law Enforcement • Military • Mining • Oil and Gas  
• Steel and Metals • Transportation • Utilities • Welding • Nuclear

## Specifications

### Length

- 75 cm or 155 cm (unless specifically stated)

### Markings

- Each labelled with its specific SKU

### Cable Styles

- Straight, Coiled
