Product Family

**Type 3 - liquid-tight protection (jet)**

Range of liquidtight single use protective clothing designed to protect against chemicals.

**New names, same products!**

In order to stay compliant with the European standards, Honeywell had to recertify 4 products of the single-use protective clothing range. For this reason, names and references had to be modified, but products remain the same, as well as the price!

See modifications in the following PDF file:

We also took the opportunity to improve our chest label by adding protection level.

- Airborne Particulates
- Biohazard
- Chemical
- Contamination
- Splash

**Warranty Information**

Limitation of use: Do not use the coveralls when there is a defect. When the closing system is faulty, the seams open or any other defect should appear. Warning: The choice and use of personal protective equipment must comply with the European Directive No. 89/656/CEE of 30/11/1989. The employer must have previously analysed and assessed the risks linked to intervention and to those generated by the use of the personal protective equipment selected.
