

CUSTOM IMPRINTING

Head Protection and Welding Helmets

Honeywell Safety Products custom imprinting is unparalleled in the industry. With our dedicated team members and state-of-the-art machines, we are committed to providing customer satisfaction and efficient turnaround. Customization helps promote your company and brand, gives character to a personal safety item, and makes it easier to identify your workers on a job site.

Pad Printing

Pad printing is a printing process using a flexible silicon rubber-pad to transfer an inked image located on a photo engraved-plate, onto the surface of an object. This unique process can transfer fine letters, intricate lines and graphics.

■ Personalize your hard hats

- Artwork is pad printed onto the hard hat
- Logos can be placed on the front, sides, or back of the hard hat
- Ability to print up to 4 colors per location
- High visibility tape* can also be added for an extra margin of protection

■ Personalize your welding helmets

- Artwork is pad printed onto the welding helmet
- Logos can be placed on the top or sides of the welding helmet
- Ability to print up to 4 colors per location

**When reflective tape is applied, logos can only be applied to the front and back locations.*

WHAT YOU NEED TO KNOW

Customer logos, slogans, etc. can be printed on thermoplastic or HDPE protective hats and caps, welding helmets, and faceshields with our state-of-the-art pad printing process. Custom imprinting details:

■ Artwork

Preferred

EPS file format (vector image), all fonts must be outlined

Accepted

High resolution JPG (300 DPI or greater)
Physical printed material such as: business cards, letterheads, actual hard hat or stickers

Not accepted

Web images, logos embedded in any Microsoft office documents, low resolution scans or faxed images of intricate logos

If artwork is available, we will have it produced at no additional charge. A draft of the artwork will be sent to the customer/distributor for approval. Order will not be entered or scheduled for art production until we have received customer/distributor approval. Once an order has been approved and processed, no changes or cancellations can be made.

Upon request, customer supplied artwork will be returned. Materials provided to have artwork produced cannot be returned. All dies and film remain property of Fibre-Metal by Honeywell or North by Honeywell. Copies of Fibre-Metal or North produced artwork will be provided for a \$20.00 processing fee.

Pad printing requires a number of graphic production steps to convert artwork to the format required for the printing process. To partially offset these costs there is a one-time preparation charge of \$90.00 per imprint design charged to the first order only. Changing ink colors during production requires a \$25.00 charge.

■ Color Matching

We can print up to 4 colors per location. Exact PMS (Pantone Matching System) is preferred. If Pantone number is not available, colors can be matched to a business card, letterhead, or any printed material supplied. If PMS color is not available and no item has been submitted for color matching, one will be chosen from our standard process. Logo colors on hats other than white may not match PMS color exactly due to the hat color bleeding through the color of the logo. Please note that colors cannot be matched from online or e-mailed images without actual Pantone numbers.

■ Lead Times

- 2 weeks after artwork approval for stock color hats
- 6 weeks after artwork approval for non-stock color hats
- Special order colors available but require 4-5 week lead time

■ Minimum Order Quantities

- 2 full cases (quantity each depends on model)
- For special order colors, minimum order ranges from 144 pieces to 480 pieces depending on style.
- Must place orders in case quantities, colors cannot be mixed to obtain case quantity
