

# Total safety solutions is company's commitment, expertise

## Honeywell Safety Products

No matter the sector in which you work, one common thread uniting everyone is the risk you are exposed to every day in your work environment. Honeywell Safety Products (HSP) is committed to your protection. This commitment drives the design and manufacture of high quality equipment and

associated training courses to meet workers' safety needs.

A division of industry giant Honeywell, HSP was built with a specific mission — to provide the broadest range of safety solutions for hazardous environments. To that end, HSP was formed through the acquisition of industry

leaders including North, Uvex, Howard Leight, Miller and more. The company's position as a global leader in the personal protective equipment market was further strengthened with the acquisition of King's Safetywear. It was the latter that gave the company access to the Oliver line of work boots.

Since 1887, the boot makers at Oliver have been crafting, perfecting and building Australia's leading safety boots and shoes. As a Honeywell brand, that expertise is now available in the United States for workers in extreme work environments. In the oil and gas industry, Oliver provides superior protection from harsh chemicals, temperatures, slippery conditions and unexpected contact with abrasive surfaces or heavy machinery.

Oliver footwear is the chosen brand for oil and gas companies around the world. Oliver's 65 Series line of footwear features chemical- and water-resistant leathers, an integrated thermoplastic urethane Safetycell protective shell and abrasion-resistant, anti-static, slip-resistant outsoles that withstand temperatures up to 572 F. Technologically advanced features, like the soft, flexible PORON Performance Cushioning Technology, NATUREform protective toe caps with a wide profile shape and NANOLite footbeds make Oliver footwear one of the most durable and most comfortable work boot lines in the marketplace.

**"The development process was very interactive, and the quality of the boot is high."**  
— HSE professional, oilfield service company

"Combining advanced technology, comfort and ergonomic features, we offer the most complete line of personal protective equipment from our world-class, industry-leading brands," said John Montigny, chief marketing officer, Honeywell Safety Products.

An oilfield service company recently called on the team to custom design a boot.

**"Honeywell Safety Products designed a boot for us that, among other things, can be used as a 'slip on' for those who don't want to lace them up,"** an HSE professional with the company said. **"They modified existing boots to meet our requirements, the development process with them was very interactive and the quality of the boot is high. The boot was well received by our employees."**

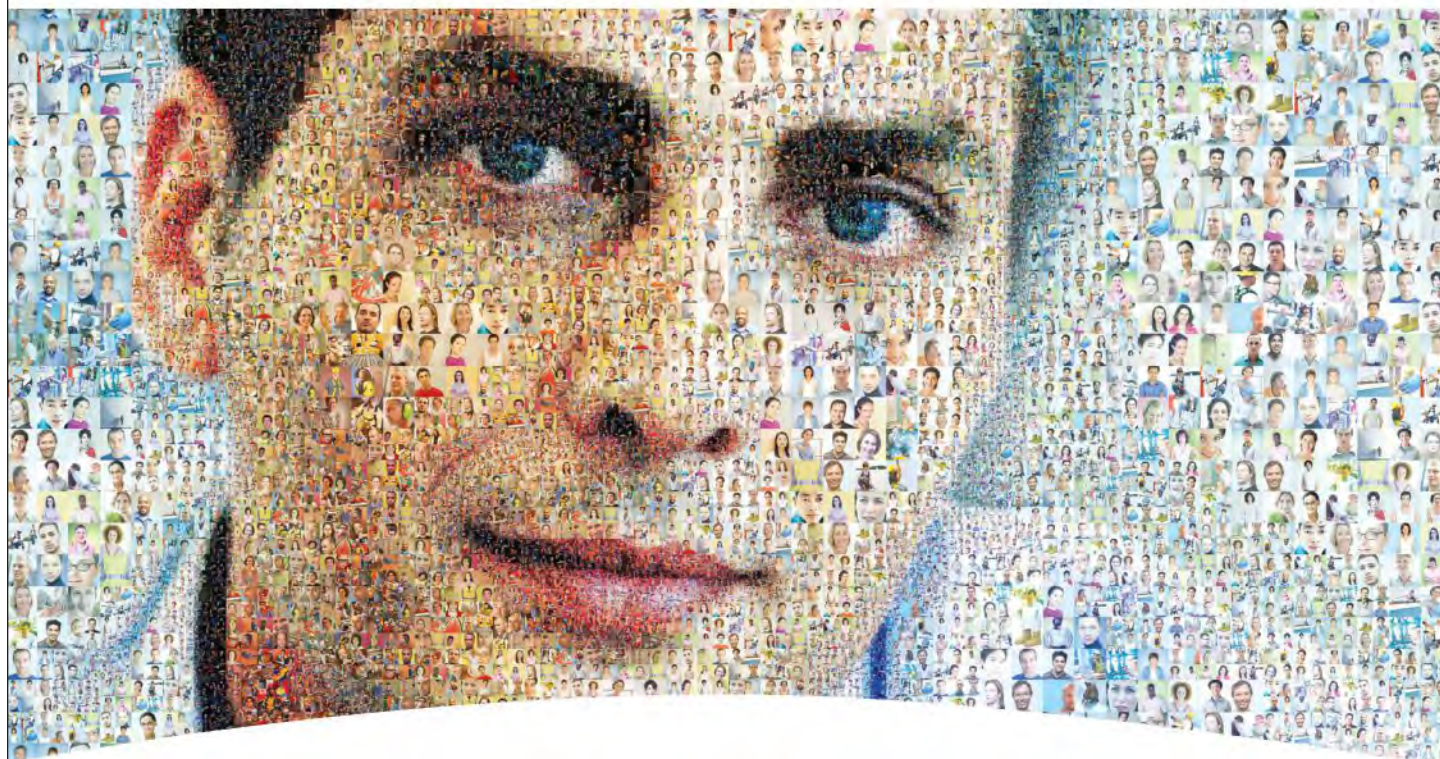

This HSE professional plans to continue partnering with Honeywell Safety Products.

**"They are responsive to our requests and offer competitive pricing,"** he said.

Safety managers everywhere are building a culture of safety in their workplace, inspiring workers to make safer choices on their own. With the right safety solutions from HSP, that challenge is starting to get a little easier.
