**TABLE 1: SAFETY AND LIMITATIONS**

- **Equipment:** All equipment must be in working order and properly maintained.
- **Respirators:** Full face respirators must be worn.
- **Mask:** Respirators must be worn at all times in areas where respirators are required.
- **Cartridge Compatibility:** Cartridges are compatible with all North respirators.
- **Replacement:** Cartridges must be replaced when they reach their end of life or when they are damaged.
- **Storage:** Cartridges should be stored in a cool, dry place.
- **Expiration:** Cartridges have an expiration date and must be replaced before that date.
- **Reporting:** Use and maintenance data should be recorded and reported as required.
- **Training:** Respirator users must receive proper training.
- **Compliance:** Respirators must comply with all applicable regulations and standards.

**TABLE 2: RESPIRATOR COMPONENTS**

- **Filter:** Filters are designed to remove airborne particles.
- **Cartridge:** Cartridges are used to filter air before it reaches the user.
- **Exhalation Valve:** Valves allow air to be exhaled from the respirator.
- **Nose Clip:** Nose clips are used to create a seal around the respirator.
- **Head Harness:** Harnesses secure the respirator to the user's head.
- **Face Seal:** Face seals ensure a tight fit around the respirator.

**TABLE 3: RESPIRATOR ACCESSORIES**

- **Head Harness:** Head harnesses are adjustable.
- **Face Seal:** Face seals are available in various sizes.
- **Nose Clip:** Nose clips are adjustable.
- **Exhalation Valve:** Exhalation valves are replaceable.
- **Filter:** Filters are replaceable.

**TABLE 4: RESPIRATOR MAINTENANCE**

- **Cleaning:** Respirators should be cleaned regularly.
- **Disinfection:** Respirators should be disinfected regularly.
- **Repair:** Respirators should be repaired as needed.
- **Testing:** Respirators should be tested regularly.
- **Replacement:** Respirators should be replaced as needed.

**TABLE 5: RESPIRATOR USER TRAINING**

- ** Respiratory Protection Program:** A Respiratory Protection Program must be in place.
- **Training:** Respirators users must receive training.
- **Instructions:** Use and maintenance instructions must be provided.
- **Records:** Use and maintenance records must be maintained.
- **Testing:** Respirators must be tested before use.

**TABLE 6: RESPIRATOR SPECIFICATIONS**

- **Filter Efficiency:** Filters must meet specific efficiency requirements.
- **Breathing Resistance:** Breathing resistance must be within specified limits.
- **Duration:** Respirators must be designed for use for a specific duration.
- **Temperature Sensitivity:** Respirators must be temperature sensitive.
- **Humidity Sensitivity:** Respirators must be humidity sensitive.

**TABLE 7: RESPIRATOR COMPLIANCE**

- **OSHA:** Respirators must comply with OSHA standards.
- **NIOSH:** Respirators must comply with NIOSH standards.
- **Other Regulations:** Respirators must comply with other applicable regulations.

**TABLE 8: RESPIRATOR INSTALLATION**

- **Installation:** Respirators must be installed according to the manufacturer's instructions.
- **Testing:** Respirators must be tested after installation.
- **Maintenance:** Respirators must be maintained after installation.
- **Replacement:** Respirators must be replaced after installation.
- **Training:** Respirators users must receive training after installation.

**TABLE 9: RESPIRATOR ACCESSORIES INSTALLATION**

- **Head Harness:** Head harnesses must be installed according to the manufacturer's instructions.
- **Face Seal:** Face seals must be installed according to the manufacturer's instructions.
- **Nose Clip:** Nose clips must be installed according to the manufacturer's instructions.
- **Exhalation Valve:** Exhalation valves must be installed according to the manufacturer's instructions.
- **Filter:** Filters must be installed according to the manufacturer's instructions.

**TABLE 10: RESPIRATOR MAINTENANCE INSTALLATION**

- **Cleaning:** Respirators must be cleaned as specified by the manufacturer.
- **Disinfection:** Respirators must be disinfected as specified by the manufacturer.
- **Repair:** Respirators must be repaired as specified by the manufacturer.
- **Testing:** Respirators must be tested as specified by the manufacturer.
- **Replacement:** Respirators must be replaced as specified by the manufacturer.

**TABLE 11: RESPIRATOR USER TRAINING INSTALLATION**

- **Training:** Respirators users must receive training as specified by the manufacturer.
- **Instructions:** Use and maintenance instructions must be provided as specified by the manufacturer.
- **Records:** Use and maintenance records must be maintained as specified by the manufacturer.
- **Testing:** Respirators must be tested as specified by the manufacturer.
- **Replacement:** Respirators must be replaced as specified by the manufacturer.

**TABLE 12: RESPIRATOR SPECIFICATIONS INSTALLATION**

- **Filter Efficiency:** Filters must meet specific efficiency requirements as specified by the manufacturer.
- **Breathing Resistance:** Breathing resistance must be within specified limits as specified by the manufacturer.
- **Duration:** Respirators must be designed for use for a specific duration as specified by the manufacturer.
- **Temperature Sensitivity:** Respirators must be temperature sensitive as specified by the manufacturer.
- **Humidity Sensitivity:** Respirators must be humidity sensitive as specified by the manufacturer.

**TABLE 13: RESPIRATOR COMPLIANCE INSTALLATION**

- **OSHA:** Respirators must comply with OSHA standards as specified by the manufacturer.
- **NIOSH:** Respirators must comply with NIOSH standards as specified by the manufacturer.
- **Other Regulations:** Respirators must comply with other applicable regulations as specified by the manufacturer.

**TABLE 14: RESPIRATOR INSTALLATION INSTALLATION**

- **Installation:** Respirators must be installed according to the manufacturer's instructions as specified by the manufacturer.
- **Testing:** Respirators must be tested after installation as specified by the manufacturer.
- **Maintenance:** Respirators must be maintained after installation as specified by the manufacturer.
- **Replacement:** Respirators must be replaced after installation as specified by the manufacturer.
- **Training:** Respirators users must receive training after installation as specified by the manufacturer.
